

Regression analysis: dependent variable statistical model(Chinese Edition)

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

(Mitchell Kuhn III)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Paperback. Pub Date: Unknown Pages: 376 in Publisher: Chongqing University Press List Price: 68.00 yuan of: (United States) Freud (U.S.). Wilson (U.S.) Pincha forward. Chen Chonglin Translation Publishing House: Chongqing University Press ISBN: 9.787.562.469.766 Page: 376 Edition: 1 Binding: Paperback: 16 Published :2012 -9-1 printing time: Words: 562.000 commodities identification: 22.890.883 contents Introduction we generally encounter problems: on hand With a group should be about a particular variable sample or experimental data. and hope to explain through statistical analysis of its traits (behavior). This analysis is usually based on variable traits can be explained by a model of such a premise. Such a model (general) in the form of algebraic expressions involving some other variable. Those other variables described experimental conditions. describe how these conditions affect the parameters and error of the dependent variable. The error expression is almost all-encompassing. any traits of the dependent variable models impossible to fully explain. Statistical analysis including parameter estimation. inference (hypothesis testing and confidence intervals) and determine the nature of the error (quantity). In addition. we must also make those statistical analysis error. data error. model selection improper conduct investigations and other violations of law constitute a statistical inference assumptions. The data can either be used for this analysis is the experimental data of the sample investigation and observation of the process (operation data). and may be collected. and the second hand data. Using all these different sources of data. especially in the use from the operation and secondary data to do statistical analysis. we need to do something more than just the number of substituted into the formula. or use a computer program to run a race data . We often...
