

Shadowfolds: Surprisingly Easy-to Make Geometric Designs in Fabric

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

Kodansha America, Inc. Hardback. Book Condition: new. BRAND NEW, Shadowfolds: Surprisingly Easy-to Make Geometric Designs in Fabric, Jeffrey Rutzky, Chris K. Palmer, Here is a book that introduces an innovative and practical craft art that utilises Origami techniques - specifically the hira-ori style - to create folded cloth patterns based on classic geometric designs. These patterns have been influenced by historic architecture and the traditional decorative motifs of many cultures, and have a layered complexity resulting from interaction with light. They change even further in appearance when back-lit (for example, when used as lampshades, or as screens). The approach is an easy-to-follow, step-by-step approach that is highly illustrated with sequential patterns and photos - more than 250 in total: all in colour. This is a book that will have a wide appeal to anyone who enjoys working with textiles and fabric, as well as origami: a total of 15 different projects are explained, including pillow designs, lampshades, neckties, bedspreads, tablecloths and divider screens. The book begins with an overview of Shadowfolding as a craft, and includes information on geometric tessellation, grids, pleats, twists, materials and folding techniques, then follows detailed instruction on how to form Shadowfolds and a gallery of different styles. The second half of the book contains the 15 projects, with useful appendices, including where the materials can be sourced in the world.
